Mike Vine again! "Blockchain tech is great for artists. It allows them to share their works, earn money for them, and simply have a public record of who created what and when - all without needing big institution like a corporation or government to be the mediator. Art thrives when it is set free, and Blockchains put control back in the hands of the artists themselves. I expect to see a flourishing of new creativity in the blocknet like we saw with the dawn of the Internet."
